International Workshop on Automotive Radar for Fully Automated Driving

Wednesday, 16th September 2020, 08.00 – 12.00 CEST (UTC+2)

Online presentations and demonstrators in virtual lab

New developments and cutting-edge research results in the automotive radar domain are presented in an online workshop on:

- General Aspects on Automated and Connected Driving
- New Radar Architectures and Novel Signal Processing
- Radar Building Blocks: New MMICs, Antenna and Packaging Concepts
- Radar Sensor Networks and Sensor Fusion
- Radar Testing and Verification

Presentations will be given online and virtual sessions allow questions and discussion of before provided videos. The real laboratories with different demonstrators will be presented in a virtual environment and show the solutions for tomorrow.
